5 inch Capacitive touch screen & Acrylic Case Kit

SKU 104990363

Raspberry Pi Screen Protector Included

Description

This package contains a 5 inch screen and a set of acrylic shell. This is a very beautiful display suite, you can make it as your second monitor computer or with the use of the raspberry pi. 5 inch capacitive screen is very powerful, it is driver freer and support multi touch even the maximum support 10 point touch. It has a very good performance in the windows platform and for Linux and for Mac are also very good. Even without the touch screen calibration, all you need to do is plug and play. Only need to adjust the resolution in accordance with the actual needs when you are using Raspberry Pi.
